

Improve cleanliness with automatically dispensed shoe covers.

auto shoe cover dispenser with disposable covers

The shoe cover dispenser automatically releases plastic covers over footwear, saving time and effort. The covers fit onto footwear without the need for bending over. Shoe covers improve cleanliness and help to reduce cross contamination in many facilities such as food processing, hospitals, farms, pharmaceutical and other areas that must remain clean. Applying the shoe covers is quick and easy: simply place your foot in the dispenser and gently press down. A pressure sensitive trigger releases the cover from the unit, covering the user's footwear.

features and benefits

- Automatically fits over shoes without bending, saving time and effort.
- Quick and easy to refill.
- Great for use in food production, factories, farms, warehouses, hospitals or wherever shoe covers are used.
- Refills available in regular and slip-resistant varieties.
- Cost effective solution.

easy to use

1. Simply place your foot evenly into the dispenser with a firm step.
 2. As you push down with your foot the shoe cover dispenser will automatically place a clean cover over your footwear.
 3. Lift your foot out and repeat with the other foot.
- The design is easy to load and ships complete with 110 regular covers.
